TELTEC Germany expands sales force

TELTEC Germany is pleased to announce a significant expansion in sales force.

By hiring two savvy, highly recognized and most experienced sales persons reporting to Thomas Bohn, TELTEC demonstrates its commitment to its partners to maximize market penetration and coverage.

For your reference, here is a brief background of the two newly hired sales professionals

Detlev Koch has been serving the semiconductor Industry for over 25 years. With Background in Electronics and Data processing he entered the Semiconductor Industry in 1988. Detlev started his carrier working on a Test floor to provide Test- and Burn-In Service for European Device Manufactures. Later on Detlev has been working in sales positions at HTT and RVSI to become the main Interface between European Customers and US- and Asia based Equipment Manufacturer. With additional 5 years' experience as a Core Commodity Manager at Infineon and Qimonda followed by his position as the VP Sales at HTT we are now pleased to have Detlev in our team.

Martin Lentmaier has nearly 30 years of experience in Semiconductor Industry. He studied Physics at University Tübingen and received the Diploma in Physics in 1984. In 1986 he started working with Telefunken as development engineer on metallization processes and reliability. Later on he has been responsible for process development and equipment & process engineering of various areas in several functions from Module Manager, Engineering Manager up to Director Fab Operations and Director Process & Technology at Telefunken Semiconductors.. With all his long-time experience in Waferfab processes, equipments, materials and projects we are now pleased to have Martin in our team.

We are confident that Detlev and Martin we will provide great value to our International Principals and our European Customer Base.
